

Anesthesiology Research Seminars

- April 13, 2006** "Fluorescence recovery after photobleaching in vascular smooth muscle cells in the rat brain." Martin Mueller, M.D., Anesthesiology, UTMB
- March 9, 2006** "The role of confocal microscopy in current research." Thomas Albrecht, Ph.D., Professor and Director, Infectious Disease and Toxicology, Optical Imaging Core, UTMB
- February 9, 2006** "Regenerative therapeutics: the role of stem cells and nanopolymers in clinical practice". Joaquin Cortiella, M.D., Associate Professor, Director, Laboratory of Tissue Engineering and Organ Regeneration, Anesthesiology, UTMB
- January 19, 2006** "Oxidative Stress as a Major Factor for Vulnerability to Sepsis in Old Age". Hiroshi Saito, Ph.D., Assistant Professor, Departments of Surgery and Biochemistry and Molecular Biology, UTMB
- December 8, 2005** "Efficacy of intraosseous drug delivery during cardiopulmonary resuscitation in swine". Chris T. Stephens, M.D., Anesthesiology, UTMB
- November 3, 2005** "Gap junctions and traumatic cerebral vascular injury". Douglas S. DeWitt, Ph.D., Professor & Director, Charles R. Allen Research Laboratories, Anesthesiology, UTMB
- October 13, 2005** "Non-invasive measurement of hemoglobin concentration and hemoglobin oxygen saturation". Donald S. Prough, M.D., Professor and Chairman, Rebecca Terry White Distinguished Chair, Anesthesiology, UTMB
- September 15, 2005** "The role of CD8+ T and Natural Killer Cells in mediating systemic inflammation during acute intraabdominal injury". Edward R. Sherwood, M.D., Ph.D., Associate Professor, Anesthesiology, UTMB
